

# Cosper – Mountain Brook

DEC Construction was contacted by our client in July of August 2009. A relative had passed away and she was attempting to renovate a family home that had been left vacant for a long period of time.

Location:  
Mountain Brook, AL

Quick Description:  
Mold Remediation and Reconstruction/  
Renovation of an 8,000 square foot home in Mountain Brook, AL.

Date of Work:  
July to August 2009

Among the many issues that DEC addressed in this home were:

- Moisture and water intrusion from roof leaks and deteriorated window caulk.
- The moisture intrusion had lead to mold infestation in several rooms throughout the home.
- The home had several instances of rotted wood on the fascia and overhangs.

DEC was contracted to resolve these issues and return the home to a useable/sellable condition. Our services included:

- Mold remediation
- Drywall Repair
- Interior and Exterior Painting
- Replacement of rotted fascia & overhangs
- HEPA air filtration
- Carpet Cleaning
